Visual Search

Visual Search

- Main Goals of Visual Search 1.0:
  - Allow users to explore search results and understand their relationships without forcing users to read every result and make those deductions
  - Add an interactive and ‘fun’ element to the EBSCO*host* interface
- Visual Search 1.0 Issues:
  - Usage very low
  - Java applet complications
  - Unacceptable reliance on a since discontinued partnership

Now, two new Visual Search options that build upon original visual search goals, and offer more features

Summary
Title: TOWARD MAKING THE AMS CARBON NEUTRAL
Date: Nov 2007
Journal: Bulletin of the American Meteorological Society
Author: HAMILL, THOMAS M.
Abstract: The author reflects on the reduction of carbon dioxide emissions by starting at the impact of conferences destination of the American Meteorological Society (AMS) in the U.S. Because of the National Academies statement on the global response to climate change, AMS officially recognizes the high probability of global warming from anthropogenic greenhouse gas emissions. Accordingly...
